Epam company

*from FEB 2020 to
MAY 2020*

Java Web courses in
Netcracker company

ABOUT ME

I make web applications and sites from design to architecture. I know a lot of modern trends in the development of web applications, which undoubtedly helps to create fast, and most importantly adaptive websites for various devices

EXPERIENCE

So far I have not been able to work in companies, but this does not mean that I did not work. I was developing websites for my friends, and sometimes I earned money on freelance.

Sometimes I experimented a lot and created projects similar to modern solutions in website design, you can view examples of them on [my github](#).

In addition, I participated in many [hackathons](#) with my team, of course, there were victories

I`ll be glad if you visit
[my website!](#)
